(54) POTTING COMPOSITION

(57)Abstract:

PURPOSE: To provide a potting composition capable of curing at room temperature in a short time by irradiation with ultraviolet rays to exhibit excellent adhesiveness and durability.

CONSTITUTION: The composition contains a composition (A) containing an oligomer component having at least one (meth)acryloyl group in the molecule, a (meth)acrylate monomer and an organic peroxide and a composition (B) containing an oligomer component having at least one (meth)acryloyl group in the molecule, a (meth)acrylate monomer, a reductive polymerization promoter comprising a thiourea derivative or L-ascorbic acid, and at least one of vanadium acetylacetonate, tin octanoate, tin naphthenate, cobalt octanoate and cobalt naphthenate, wherein at least one of the compositions A and B contains an ultraviolet-polymerization initiator.

LEGAL STATUS

[Date of request for examination] 09.10.1997

[Date of sending the examiner's decision of rejection] 24.08.1999

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
